

KANISHK CHANDNA

FULL STACK DEVELOPER

- +91 9268815903
- kanishkchandna29@gmail.com
- Delhi, India
- www.linkedin.com/in/kanishk-chandna

PROFESSIONAL OVERVIEW

Full-Stack developer with hands-on experience building GenAI Powered applications end-to-end, from system design to deployment. Skilled in Node.js, Express, Next.js, MongoDB, and OpenAI APIs, with practical experience in RAG based systems and real-world production projects. Comfortable working across stack, translating ideas into scalable products, and delivering solutions for freelance clients as well as personal products. Actively seeking Full-Stack roles in startup environments, open to remote, onsite, or internship opportunities.

PROJECTS

Thumbly – AI Thumbnail Generator

Tech: Next.js, Node.js, MongoDB, OpenAI, Cloudinary

Live URL: <https://thumbly.kanishk.app>

- Built an AI-powered thumbnail generation platform that helps creators generate high-quality thumbnails automatically.
- Designed and developed the full-stack architecture, including prompt engineering, API integration, and image processing pipeline.
- Acquired **50+ real users** organically and achieved real-world adoption.
- Project was featured in **Hitesh Choudhary's YouTube video**, validating product relevance and usability.

PlugRag – Plug-and-Play RAG Chatbot Platform (MVP)

Tech: Next.js, Node.js, MongoDB, OpenAI, Vector DB (Qdrant), BullMQ, Langchain, AWS S3, Clerk

GitHub repo URL: <https://github.com/kanishk2004/plugin-rag>

- Developed a plug-and-play GenAI chatbot platform with Retrieval-Augmented Generation (RAG) capabilities.
- Implemented document ingestion, embedding generation, vector search, and contextual response pipelines.
- Built a modular architecture enabling developers to integrate chatbots into any website using an embeddable script.
- Designed the MVP with scalability in mind, including background processing and multi-bot support.
- Currently evolving the platform toward a production-ready SaaS solution.

Additional projects

- Built multiple full-stack and backend-focused projects across GenAI, APIs, and web applications.
